New Learning Management System

New Financial Management System

New ASU Mobile App

Advanced Endpoint Protection

New Learning Management System (LMS)

- Canvas by Instructure has been selected to replace our current LMS

- Blackboard and Canvas will run in parallel for the next 14 months

- Canvas is a cloud hosted solution which will give us among other things high availability and improved student experience for both desktop and mobile

- Blackboard will not be available after **June 30, 2019**

  - https://lms.asu.edu

canvas

New Financial Management System (FMS)

- The FMS project consolidates the university's financial, purchasing, planning and budget systems in a single modern sustainable platform

- New AWS cloud analytics environment for financial users of the data warehouse with access to both legacy and FMS data

- Go-live date is **July 1, 2018**

  - https://cfo.asu.edu/fms

  - https://analytics.asu.edu/hr/financial/Pages/Home.aspx

New ASU Mobile App

Digital Engagement Focus

- New **ASU Mobile App** has been launched this week in 'beta' form with a full version release expected for fall.

- New capabilities launched **based on student surveys** include:
  - Wayfinding around campus
  - Personalized Push Notifications
  - Authenticated Profile (personalized news/feed/class schedule)

- More exciting features to follow in our fall release, based on student feedback and app engagement metrics.

- E-mail us at mobiledev@asu.edu
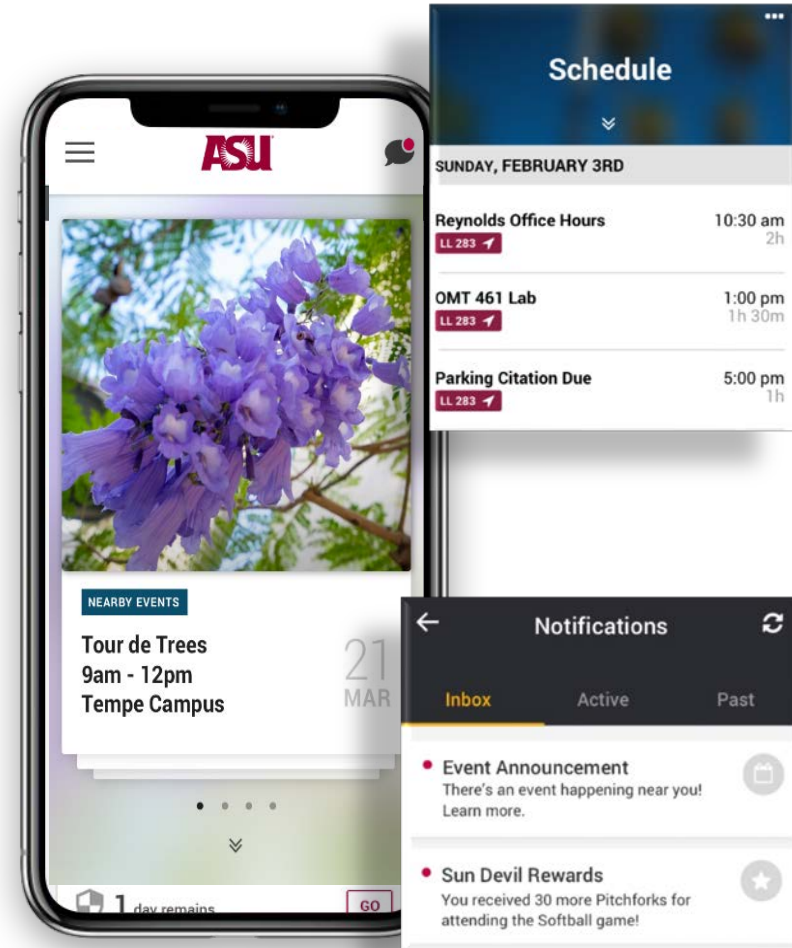

Advanced Endpoint Protection

- Implementation of advanced protections for laptops, desktops, tablets and phones detection and response tool to protect ASU's diverse endpoints. Projected implementation beginning fiscal year 19.

- Endpoint Visibility: It is impossible to fix what you don't know exists. This project put together a dashboard that tracks the status of approximately 30,000 ASU Endpoints.
  - To learn more please visit https://getprotected.asu.edu/
  - Or if you have questions via email infosec@asu.edu

- 2018 IT Risk Assessment and Remediation: Ongoing effort for UTO to partner with the different academic departments to eliminate risk in five main areas:
  - End user devices
  - Asset inventory
  - Network vulnerabilities
  - Continuity of operations
  - Security awareness
