

ASU University Services and Facilities Committee

Annual Report - April 17, 2014

To: Thomas Schildgen, Senate President

From: Francisco Lara-Valencia, Committee Chair

As of April 17, 2014, the University Services and Facilities Committee did not receive any request from faculty regarding issues involving concerns about the services and facilities provided by the university to perform teaching or research activities. During the year, the committee kept working on the development of a survey to obtain periodic information from faculty and academic professionals about their opinion and assessment of the quality of classrooms, labs, computing services, office space, etc. The survey will be conducted online to faculty and academic professionals in all four campuses in the fall of 2014. The committee believes that the information produced by the survey would be of great value for current maintenance and capital improvement programs, as well as for the design of new university services.
